

Hybrid Pro 20x20 Modular Island Kit 23

HP-K-23

Hybrid Pro™ Modular Kit 23 is a sophisticated and symmetrical 20ft x 20ft island exhibit, perfect for an exhibitor looking for features and functionality. Kit 23 features a heavy-duty aluminum extrusion center frame that supports two square-shaped fabric structures.

The top fabric structure is a tube structure with pillowcase fabric graphics and is meant to display your company logo so all in the exhibit hall can see it from afar! The center square utilizes the extrusion posts to create an additional area for branding and messaging above eye-level. Two 8ft tall floor displays add features and functionality. With medium monitor mounts and three shelves for small product display on each, the floor-based displays are designed to show and communicate your service offering in digital form and your product in physical form. Counters near the center posts add areas for storage and reception.

features and benefits:

- 14'4" tall island display
- No rigging required
- Features two square fabric structures up high to draw visitors to the booth
- Floor based backwalls feature push-fit f
- Center counters add storage and reception areas
- Ships freight in a woodcrate
- Medium monitor bracket on center wall holds 32-55" LCD*, max weight: 80 lbs
- *Monitors & flooring are not included

dimensions:

Hardware	Graphic
Assembled unit: 244.33"w x 171.5"h x 168"d 6206mm(w) x 4357mm(h) x 4268mm(d) Approximate weight: 1130 lbs / 513 kg	Refer to related graphic template for more information. Visit: https://www.theexhibitorshandbook.com/download-graphic-templates
Shipping	additional information:
Packing case(s): WOODCRATE-H 101"w x 53"h x 50"d 2566mm(w) x 1347mm(h) x 1270mm(d) Approximate total shipping weight: 1510 lbs / 684 kg	Graphic material: Dye-sublimation SEG push-fit fabric When included in a larger kit, a different packaging solution will be listed to accommodate all contents of the kit. Individual packaging no longer provided. Tabletop Colors:  silver  black  mahogany  natural 3 person assembly recommended:   
 This product may include the following materials for recycle: aluminum, select wood, fabric, cardboard, paper, steel, and plastics.	

We are continually improving and modifying our product range and reserve the right to vary the specifications without prior notice. All dimensions and weights quoted are approximate and we accept no responsibility for variance. E&OE. See Graphic Templates for graphic bleed specifications.

SET-UP NOTES

1. Redesign of this exhibit without approval by Manufacturer may result in dangerous and unsafe structures. Manufacturer disclaims any responsibility for redesigned exhibits it does not approve in writing.

2. Parts and components such as panels and extrusions are manufactured to metric sizing. Where ever possible sizes have been noted in feet and inches as well as in metric. Below is the imperial to metric sizing table as reference. "Nominal" refers to approximate size.

NOTE: PARTS MAY COME LOCKED TOGETHER FOR PACKING PURPOSES.

IMPERIAL TO METRIC SIZES

8' Nominal = 94 1/2" or 2400mm Actual
4' Nominal = 47 1/4" or 1200mm Actual
3' Nominal = 35 7/16" or 900mm Actual
2' Nominal = 23 5/8" or 600mm Actual
1' Nominal = 11 13/16" or 300mm Actual

FABRIC, VINYL & UV GRAPHIC CARE GUIDELINES

GENERAL HANDLING FABRIC GRAPHICS

- Your fabric graphics should always be handled in a clean, dry area with clean hands. When possible, use white fabric gloves.
- Be sure fabric is clean and dry before packing.
- Machine washing and/or drying is not recommended for all fabrics. Refer to chart below for which fabrics are washable.

EMERGENCY STAIN TREATMENT (FABRIC)

1. For dry stains, like loose dirt or pencil marks, try initially using masking tape or Magic Eraser (dry-not moistened).
 - Masking tape or MagicEraser (dry) can be quite effective at lifting dry, surface dirt. Try 'pulling' as much of stain away as you can. Avoid rubbing stain into fabric.
2. Introduce water or liquid cleaner for stains not responsive to masking tape or dry Magic Eraser.
 - When using liquids to treat stains, if at all possible, treat the stain with fabric off of the frame.
 - Place a clean dry cloth behind stain (to absorb stain while being treated). Moisten another cloth initially with just water (distilled water is optimal, if available).
 - Gently blot stain with moistened cloth (or small area of moistened Magic Eraser), while trying to push stain through to the back, using the dry cloth to absorb.
 - Repeat using care to keep the wet area as small as possible.
3. Grandma's Secret Spot Remover can be an effective stain remover. Mix several drops in a small cup with clean water. Repeat above technique, taking care to keep wet area as small as possible and using dry cloth on back of stain to absorb.

MACHINE WASHING FABRIC GRAPHICS

- Cold water/delicate cycle/tumble dry low or air dry. For stretch fabrics do not use dryer, let hang dry.
- Use caution on dryer time with graphics containing liners. Its best to put tension fabric on frame when fabric is still damp and let it air dry. Always be sure that the aluminum frame is clean when mounting the damp graphic.
- Fabric stretch graphics that are washed and machine dried may shrink up to 3/4" per every 50" of fabric in the direction of the stretch and shrink up to 1/4" in the non stretch direction.

STORING & PACKING BACKLIT GRAPHICS

- To avoid cracks in the ink or having to steam graphics, Backlit fabrics should be loosely folded with bubble wrap or stored around a tube.
- Avoid folding the graphic tightly to store in a small bag or box.

GENERAL HANDLING VINYL & UV GRAPHICS

- Vinyl banners and rigid graphics should always be handled in a clean, dry area with clean hands. When possible, use white fabric gloves.
- Be sure vinyl/ UV is clean and dry before packing. Always follow material handling and packing instructions included.
- All vinyl materials should be rolled with graphics facing in to protect the graphic printed side. Roll on a tube if available.
- Avoid folding materials to reduce the risk of crease lines and chipped inks. If a graphic must be folded, try to fold loosely and as few times as possible.

EMERGENCY STAIN TREATMENT (UV)

- For drier stains, like loose dirt, pencil marks or adhesive, try initially using masking tape. Masking tape can be quite effective at lifting dry, surface dirt. Try 'pulling' as much of stain away as you can and avoid rubbing the stain into the material.
- When using Solvent to clean a stain be sure to avoid any image. Solvent is aggressive and will take the image off. Soapy water should be used at a ratio of 1 part Dawn® /10 parts water.
- While using Windex® avoid scrubbing harshly. Too much pressure can fade the graphic print.

GENERAL HANDLING OF ROLLABLE PVC PANELS

All mural panels, truss panels and detachables should be rolled with graphics facing out to protect the graphic printed side. Mural panels should be stored in the original plastic sleeves that are provided with the panels.

FABRIC, VINYL & UV GRAPHIC CARE GUIDELINES

STEAMING FABRIC GRAPHICS

- For optimal results, steam wrinkles when fabric is tensioned and installed securely on the frame.
- Fill steamer with clean drinking water or distilled water. Avoid using water containing hard minerals.
- Hold steamer upright and hold close to fabric. Avoid touching fabric with steamer.
- Do not tip steamer as water drips may cause water marks to form on graphic.
